

Thanks
for buying...

WHY REBEL?

REBEL WIPES ARE DIFFERENT!!!

We don't always conform to the same specifications, sometimes the fabric might be orange, white, purple, red, green, who knows, the lid could be just about any color too!

While you might not always get the exact same thing from us... you'll always get tough towels with the dragon milk that makes our grease, grime, & grunge-kicking wipes the absolutely best bang for your buck.

We're different because, we use what we have at the best price, we pay less, you pay less and we give away more! Please understand, we do not ask for donations; we sell great wipes at a great price and give away the profits.

We want you to see where we put out money. Check out www.rebelwipes.com and if you feel like it, put some of your money there too.

HEY, CHECK OUT THE SWAG
IN THE CASE THIS TIME!

It's been brought to our attention that Eddie (our Eagle) has been riding his cycle without goggles. He may be a REBEL that doesn't mean he's an idiot! He just took them off for the picture (he's a little vain).

We all know to wear eye protection on our bikes!!! **2.5 million eye injuries occur every year in the U.S. alone! 90% of eye injuries are preventable with proper eye protection.** (Hey, it's the number one cause of blindness!)

Always wear safety glasses when:

- Using an ATV, Harley, Indian, Buell, riding mower, even a "weed wacker" or a Vespa
- When hitting anything with a hammer, axe, pipe wrench or lead pipe
- Working with power tools – grinders, drills, saws, routers, and jack hammers
- Shooting a 38, 9mm, 45, AK or for that matter even a Red Rider BB gun
- Working on stuff that can produce particles, dust, shards or dusty stuff from materials like glass, plexiglass, wood, plastics, cement, and drywall
- Playing around with chemicals, including common household ones like bleach, ammonia, carb cleaners, and heavy duty degreasers
- Working with cement – especially dry but also wet
- Welding – hell, you should be wearing a welding mask!
- "Jumping" the battery of a motor vehicle
- Sitting around watching anyone doing all of these things means you should be wearing safety glasses too!

Anyway there are **two ANSI approved safety glasses** (one pair of the cool safety "wrap around your eyes" sunglasses) **FREE with every case of REBEL – Grease, Grime, & Grunge-Kicking Wipes.**

By the way Prevent Blindness America asks everyone to wear eyewear approved by the American National Standards Institute (ANSI).
